Services Agreement

Oxehealth

This Agreement is made the 2nd day of August 2018

BETWEEN:-

- (1) **Oxehealth Limited** a company incorporated under the laws of England with company registration number 08163325 and whose registered office is at The Sadler Building, Heatley Road, Oxford Science Park, Oxford, OX4 4GE ("Oxehealth"); and
- (2) **Kent & Medway NHS and Social Care Partnership Trust** of Trust Headquarters, Farm Villa, Hermitage Lane, Maidstone, Kent, ME16 9PH ("Partner").

BACKGROUND:-

- A. Oxehealth is a spin-out from Oxford University which specialises in novel technology that turns digital video cameras into health & activity monitors. Oxehealth is currently in the process of developing product lines using Oxehealth's proprietary software that provide safety and health monitoring of patients ("**Oxehealth Software**"): Oxecam Human Detection software monitors a room and alerts if no human activity is detected ("**HD Software**"); and Oxecam Remote Vital Signs Probe software which captures human vital signs ("**RVS Software**"). It is intended that when development is completed and the HD Software and RVS Software is placed on the market, RVS Software will be certified as a medical device as it holds a medical purpose. Whereas, HD Software is intended solely for activity monitoring and therefore will not be a medical device. Collectively, the RVS Software and HD Software are referred to as the Oxehealth Software.
- B. Partner would like to explore how Oxehealth's Software monitoring solutions could be used in the future to improve its patient care and safety monitoring regimes (the "Purpose").
- C. The Parties therefore wish to enter into this Agreement in order that Oxehealth can licence and provide its monitoring software and services to Partner by way of a pilot at the Location.

THE PARTIES AGREE AS FOLLOWS: -

- 6.10 The parties to this Agreement acknowledge that damages alone would not be an adequate remedy for any breach of the provisions of this Agreement. Accordingly, without prejudice to any other rights or remedies that any party to this Agreement may have, the parties agree that they shall be entitled to equitable relief, including injunctions and orders for specific performance, in the event of any breach of the provisions of this Agreement, in addition to all other remedies available at law or in equity.

- 13.4 Nothing in this Agreement excludes or limits Oxehealth's liability for: (a) death or personal injury caused by its negligence; or (b) fraud or fraudulent misrepresentation.
- 13.5 Except as expressly and specifically provided in this Agreement, all warranties, representations, conditions and all other terms of any kind whatsoever implied by statute or common law are, to the fullest extent permitted by applicable law, excluded from this Agreement.

Schedule 4 (Data)

Data Category	Description
Anonymised Video Data	Oxehealth will anonymise the camera feed so that the individual is not identifiable from the video. Oxehealth will compress and encrypt this feed and supply it securely to its secure servers. Anonymised Video Data is required for Oxehealth to debug and improve the Oxehealth Software for the Purpose. The Anonymised Video Data cannot be viewed by unauthorised persons because it is encrypted and – even were it decrypted - the anonymisation prevents the individual being identified. Oxehealth may delete Anonymised Video Data at its election unless notified by Partner that it should retain the Anonymised Video Data and must do so at such time as Partner may direct.
Algorithm Processed Data	These are mathematical results from various processing stages of the algorithms, including the final log file. Algorithm Processed Data are used in conjunction with the Anonymised Video Data to debug and improve the Oxehealth algorithms used for the Purpose. These data are also encrypted and sent to Oxehealth's secure servers. These data cannot identify an individual.
Alert Data	When the algorithm has completed its processing of the camera feed, saving the information to the log file, it extracts room status reports (" Alert Data ") which are supplied to the output server (" User Module "). These Alert Data are recorded by the User Module and drive the audible alerts and screen displays (" Alerts "). Alert Data supplied to the User Module shall be the property of Partner. For the avoidance of doubt Alert Data does not include any Oxehealth Intellectual Property Rights in the User Module, user interface or any other part of the Oxehealth Software.
Partner Input Data	As part of the Oxehealth Services, the Oxehealth Software enables Partner Personnel to log their responses to Alerts in the user interface. They can also log or comment on noteworthy events which they would like investigated in the user interface (for example the Oxehealth Software did not Alert to an incident or they observed an incident and would like Oxehealth to examine the algorithm outputs created during it). Partner warrants that no personal data shall be contained within the Partner Input Data.
Salient Video Data	As part of the Services, the Oxehealth Software enables Customer Personnel to be able to tag time periods during which events of interest to them have occurred and for which they would like to be briefed on the algorithm's performance and potential. The raw video for these periods is called Salient Video Data. Oxehealth's algorithms or Oxehealth Personnel

	may also identify Salient Video Data required fully to debug the system or which may present additional interesting insights to the Customer as part of the Purpose. This data is encrypted and held separately to the Anonymised Video Data and Algorithm Processed Data. Oxehealth will periodically collect the Salient Video Data and transport it by hand to Oxehealth's offices. Oxehealth will undertake periodic reviews with the Customer of the Salient Video Data held and the purpose for retention. In contrast to Anonymised Video Data, Salient Video Data is encrypted but not anonymised because unanonymised data is required fully to investigate the algorithm's performance. In contrast to Anonymised Video Data, Salient Video Data will be short episodes so the total volume of video is expected to be low. Oxehealth may delete Salient Video Data at its election unless otherwise notified by Customer and must do so at such time as Customer may direct.
Oxehealth Data Annotations	Oxehealth staff may create notes and other commentaries ("Oxehealth Data Annotations") relating to Salient Data, Anonymised Data, Algorithm Processed Data, Partner Input Data or Alert Data. Oxehealth shall own all right, title and interest in the Oxehealth Data Annotations and the same shall vest in Oxehealth on creation.
